## MPK-1000 METAL-IN STATIC SHIELDING BAGS

Miller Packaging's MPK-1000 Metal-in Static Shielding Bags are transparent, metalized static shielding bags that provide a safe package for your ESD sensitive products. These bags are a four-layer construction incorporating a polyester dielectric and a metal layer to provide Faraday effect shielding of ESD and fields. Tribocharging is minimized by the specially processed polyethylene. The bags are available flat or with various style closures. Miller Packaging bags are coded for QC traceability.

### Standards

Meets electrical and physical requirements of MIL-PRF-81705 Type III, EIA 541, EIA 625, MIL-HDBK-263, MIL-STD-1686 and EOS/ESD Standards.

### Material Structure

MPK-1000 metal-in flat and zipper-closure static shield bags are made from industry-approved polyester/aluminum/polyethylene laminate. The polyester dielectric in concert with the metal layer provide Faraday Effect shielding of ESD. The metal layer prevents penetration of damaging electrostatic fields. Tribocharging is minimized by the specially processed polyethylene.

Avialable flat with open top or with a zipper, adhesive tape or other style closure.
